Introduction to Nature Frost

Nature Frost is a frozen fruits and vegetables processing company focused on delivering consistent quality, food safety and year-round availability of premium agricultural produce.

Located in Bihar, India, Nature Frost is being developed as a modern frozen fruits and vegetables processing facility serving food businesses, institutional buyers, modern retail, HoReCa and distribution markets.

We combine carefully selected farm-fresh produce with modern food-processing technology to create high-quality IQF (Individual Quick Frozen) products that help preserve the natural taste, colour, texture and goodness of fruits and vegetables.

Our Mission

To preserve the goodness of nature through technology and deliver safe, convenient and high-quality frozen fruits and vegetables to customers throughout the year. We aim to build strong farmer and supplier relationships; reduce agricultural wastage; add value to Indian farm produce; maintain high standards of food safety; develop innovative frozen-food products; create reliable supply chains; and serve customers with consistency and integrity

Our Vision

To become a trusted Indian name in frozen fruits and vegetables.

We envision Nature Frost as a leading food-processing company that brings together Indian agriculture, modern technology and global food-quality standards. Our long-term ambition is to build a strong frozen-food brand from Bihar and take high-quality Indian agricultural produce to consumers and businesses across India and international markets.

A Project Supported By The Ministry Of Food Processing Industries

Government of India | Pradhan Mantri Kisan SAMPADA Yojana Nature Frost is being developed as a modern frozen fruits and vegetables processing facility under the Creation/Expansion of Food Processing & Preservation Capacities (CEFPPC) Scheme of the Pradhan Mantri Kisan SAMPADA Yojana (PMKSY) of the Ministry of Food Processing Industries (MoFPI), Government of India.

The project reflects our commitment to strengthening India's food-processing infrastructure, promoting value addition of agricultural produce, reducing post-harvest losses and creating a modern farm-to-market supply chain. With a planned 3 MT/hour IQF processing capacity, Nature Frost aims to transform quality Indian fruits and vegetables into high-quality frozen products for customers across India and international markets

Our IQF Technology

IQF stands for Individual Quick Freezing. Unlike conventional bulk freezing, IQF technology rapidly freezes individual pieces of fruits and vegetables, helping preserve their natural characteristics while making the product convenient to store, handle and use.

Our processing approach is designed to maintain natural colour, fresh taste, texture and appearance, nutritional quality, individual piece separation and product consistency.
